

Town of Lexington
Department of Public Works
Engineering Division

October 4, 2012

Dear Lexington Resident:

The Town of Lexington seeks to improve pedestrian, bicycle and vehicular traffic safety as well as improve traffic operations along a section of Massachusetts Avenue in Lexington. The project area is approximately 3,500 feet long and extends from Pleasant Street to Marrett Road. Please see enclosed sketch.

We value your opinions very highly; therefore, we have scheduled an informational workshop to solicit input and bring interested parties together to build and achieve project consensus. The workshop will focus on identifying project components and issues such as the safety and welfare of the vehicular, bicycle and pedestrian traffic as well as impacts to abutting properties. This project's success can only be achieved with the community's collective input.

We ask that you invest some of your valuable time to provide your thoughts and influence to make this project successful for the community and for future generations. We appreciate your assistance and commitment to your community.

The workshop will be held on Thursday, November 8, from 7:30 to 9:30 in Cary Hall, 1605 Mass Ave., Lexington, MA.

If you have any questions or concerns please contact me directly.

Sincerely;
Dave Cannon P.E.
Assistant Town Engineer
Town of Lexington, MA
